# REPORT OF THE BOARD OF MANAGEMENT

for the year ended December 31st, 1943.

THE Board of Management have pleasure in presenting the Annual Report and Statement of Accounts for the year ended 31st December, 1943.

Restricted in size owing to the need for paper economy, which also prevents the publication of the detailed lists of Subscribers and Donors, to whose generous support the Board is so much indebted. Complete lists of subscribers may be examined, if desired, at the Secretary's Office.

It is with sincere regret that the Board record the death of our President, Mabel Lady Crossley, who had acted as President since 1916 and had been Vice President since 1911.

The activities of the hospital at its various branches has progressed satisfactorily and details of the work done are given in the General Report. The work at Bowdon has suffered through not having been able to obtain the services of a suitable Resident House Surgeon during the latter part of the year. At Delamere we are fortunate in having the services of Dr. Houston as our Medical Superintendent. Dr. Houston took up his duties in January and is to be congratulated on the keen interest he has taken in his duties since his appointment.

The Board have adopted the recommendations of the Rushcliffe Committee in regard to Nursing Salaries and conditions of service. Shortage of nursing and domestic staff has been considerable and this has made it imperative to renovate the kitchen equipment at Delamere which has become out of date and passed its most useful and economical period. The Board sought expert advice and as a result decided to modernise the whole kitchen. This work will be carried out as soon as the necessary permits are obtained.

The need for some form of heating of the Nurses' Home at Delamere has also been considered and after obtaining the advice of a consulting engineer, the Board has decided to equip with central heating and permits have been applied for.

The Board are again grateful to the Manchester and Salford Hospital Saturday and Convalescent Homes Fund for their generous support and successful efforts in improving the rate of pay for treatment from outside Contributory Schemes.

Thanks are also extended to :—

The Oldham Ladies Committee,  
Manchester & Salford Medical Charities Fund,  
Trustees of Booth's Charities,  
The Manchester Corporation,

and to all who subscribed so generously during the year.

The following Legacies are gratefully acknowledged :—

			£	s.	d.
Exors of Mrs. C. E. Phillips	...	...	166	12	2
do. Thomas Nichol	...	...	500	0	0
do. Walter Pownall	...	...	100	19	11

Thanks are again given to the Members of the Honorary Medical and Surgical Staff for their loyal and untiring services. The paid Medical Staff, the Nursing and Administrative Staff have given valuable service for which the Board records its appreciation. The Board wishes specially to commend the devotion of the respective Matrons the burdens and anxieties of whose work has been considerably increased by war conditions, shortage of staff, catering and other difficulties but whose courage has overcome all obstacles and contributed so successfully in maintaining the high reputation of our hospital.

The Honorary Auditors, Messrs. Litton, Pownall, Blakey and Higson, have again given their valuable time and services which are greatly appreciated by the Board.

Thanks are tendered to the Reverend E. H. Barnes and Father Higgins for their ministrations to the patients and staff.

In the coming year greatly increased expenditure will be incurred by the incidence of the new scale of wages and in providing the new kitchen equipment and the heating of the Nurses' Home at Delamere. The Board hopes that increased support will be forthcoming from the general public to help meet the extra cost.

# GENERAL REPORT

Year ended 31st December, 1943.

## Manchester.

The attendances at the Out-patient Clinic in Hardman Street shows an increase over 1942 as will be seen from the statistics shown on the report.

## St. Anne's Home, Bowdon.

Another increase in the work done at the Out-patient Clinic shows steady progress at this department. The attendances and the number of new out-patients have both reached new records. The number of operations performed, however, is lower than last year. This is accounted for by depletion of our Honorary Staff and our not being able, through existing war conditions to obtain the services of a suitable Resident House Surgeon.

## Crossley Sanatorium, Delamere.

Throughout the year the number of occupied beds has remained steady. The increase in the length of treatment given has resulted in a slight decrease in the number of patients admitted and discharged. This is due to the fact that cases admitted have tended to be rather more advanced than in past years. A study of the following table of age and sex incidence on admission shows, as in previous years, a preponderance of female cases in the 15—25 years groups, with a very considerable decrease of the cases in the higher age groups. In the males the rise and decline in the age incidence is less rapid. This coincides with the general findings throughout the country.

### Age and Sex of Admissions.

Age	Males	Females	Total
15—20 years ... ..	7	11	18
21—25 years ... ..	10	30	40
26—30 years ... ..	10	11	21
31—35 years ... ..	10	9	19
36—40 years ... ..	6	8	14
41—45 years ... ..	9	1	10
46—50 years ... ..	5	1	6
51—55 years ... ..	3	2	5
Over 55 years... ..	—	—	—
	60	73	133

Throughout the year treatment followed the usual lines and can be divided as follows :—

- (a). Routine treatment.
- (b). Surgical treatment.
- (c). Gold treatment.

The results of individual and combinations of the above treatments were as follows :—

### Results of Treatment of Patients Discharged.

#### Males.

Group	Quiescent	Improved	Stationary	Worse	Died	Total
Minus ...	1	5	—	—	—	6
Plus 1 ...	—	12	—	—	—	12

	2	54	10	3	4	73

#### Total.

Males and Females ...	3	97	19	4	8	131
--------------------------	---	----	----	---	---	-----

Of the patients who died during the year, in every instance the disease was extensive in both lungs.

### Summary of Results on Discharge with reference to Sputum.

#### (a). Routine Treatment only.

86 cases	
Positive on admission	} 36. i.e. 41.86%.
Positive on discharge	
Positive on admission	} 29. i.e. 33.71%.
Negative on discharge	
Negative on admission	} 21. i.e. 24.43%.
Negative on discharge	

The number of cases discharged with positive sputum at first appears high, but can be accounted for as follows :—

- (1) 8 were transferred to other hospital, 6 for surgical treatment of the chest, one for other surgical treatment and one transferred to Baguley Sanatorium to be nearer home.
- (2) 11 were discharged at their own request.
- (3) 3 were discharged for breach of hospital regulations.
- (4) 7 died.

The remaining seven positive discharges were extensive chronic cases all of whom had received previous treatment at this or other sanatoria.

(b) *Artificial Pneumothorax.*

Discharged with Positive Sputum — 6. *i.e.* 26%  
Discharged with Negative Sputum — 17. *i.e.* 74%

The cases in this group discharged with a positive sputum may be accounted for as follows :—

Two cases refer to the same patient who was in the first instance transferred for treatment of an intercurrent disease and on the second occasion discharged for breach of hospital regulations. Two of these cases were transferred to other hospitals, one for treatment of intercurrent condition and one to Baguley Sanatorium. The remaining case did not return from leave and was subsequently discharged.

(c) *Gold Treatment (Crisalbine).*

In this group the number of cases treated was nine of whom the sputum previously positive became negative in six cases.

(d) *Thoracoplasty.*

Discharged with Positive sputum — 4 cases.  
Discharged with Negative sputum — 2 cases.

Regarding positive discharges it should be noted that one case was actually a transfer for a third stage thoracoplasty and that following this operation the sputum became negative. In two instances sputum remained positive following operation and in the fourth case after the 1st stage thoracoplasty there was an acute spread to the other lung, and further surgical treatment was abandoned.

(e) *Phrenic Nerve Operations.*

Discharged with Positive sputum — 3 cases.  
Discharged with Negative sputum — 1 case.

In this group one case discharged with positive sputum was a patient discharged at his own request.

(f) *Extra-Pleural Pneumothorax.*

One case was treated with no apparent advantage and on discharge sputum remained positive.

(g) *Monaldi Cavity Drainage.*

Two cases were treated. In one case while the sputum remained positive the cavity became smaller and this treatment was carried out preparatory to thoracoplasty. The

other case showed no benefit whatever from treatment and the sputum remained positive.

### **Summary of Gain or Loss in Weight.**

#### *Males.*

Gained weight — 44 (75.86%).  
Lost weight — 9 (15.50%).  
Stationary — 2.  
Not weighed — 3.

Average gain in weight of those who gained — 8.9 lbs.  
Average loss in weight of those who lost — 8.25 lbs.

#### *Female.*

Gained weight — 62 (84.93%).  
Lost weight — 4 (5.47%).  
Stationary — 1  
Not weighed — 6.

Average gain in weight of those who gained — 10.94 lbs.  
Average loss in weight of those who lost — 14.87 lbs.

### **X-Ray Department.**

During the year the total number of X-Ray films taken amounted to 903. In addition to this the X-Ray apparatus is in constant use for fluoroscopy in the control of treatment.

### **Laboratory.**

The routine examinations of sputa have continued as before, and the research commenced some time ago by Mr. R. B. Whittington has been continued and considerably elaborated. Work is now proceeding with the conversion of one of the adjacent rooms to assist further research.

### **Occupational Therapy.**

During the latter part of the year one of the rooms in the basement was converted into a small workshop for the use of the ambulant male patients. At present this is confined to woodwork but it is hoped to extend it in the future to include other branches of occupational therapy.

### **Entertainment.**

The weekly film entertainment terminated in March and recommenced in October. Throughout the year whist drives, etc., have continued to be held, these together with the film shows have been greatly appreciated by both patients and staff.

### **Library.**

During the year the library has continued to give good service. Considerable work has been carried out in the re-cataloguing, and a more up to date system in the issue of books is in the process of being introduced.
